*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building 109 is a one-story rectangular building with a two-story wing to the north and a high one-story fire station attached to the west. The windows are fixed and transom in metal sash. High roll-up doors provide access on the north and south sides of the fire station, and on the north side of the two-story wing. Single and double doors with glass upper panes provide access to the administration building.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building 151 is a small rectangular flat-roof prefabricated metal building on a concrete slab foundation. It houses two pumps that are attached to a large water tank. Sliding windows in metal sash light the north and west sides, and a metal single door provides access on the east side. The adjacent well pumped the water into the tank. From there the water traveled by gravity flow to pump water for normal use throughout the base or to pump water for fire.

*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building 168 consists of two double-wide quonset huts linked by an entrance on the south side. A plywood shed addition extends to the north. The foundation and end walls are concrete block, and the rounded roof is corrugated metal. The main entrance on the south, with aluminum and glass windows, is protected by a wood canopy supported on a brick pier wall. The doors and windows are glass in aluminum frames. Brick sheathing has been applied to the west side.
