Subject: Building 19 First Floor Renovation, Revised Project Description, NASA Ames Research Center, Moffett Field, Santa Clara County, California

Dear Mr. Ikan:

The California State Historic Preservation Officer (SHPO) has received the August 15, 2023, letter continuing consultation regarding an undertaking at NASA Ames Research Center (ARC). NASA is consulting with the State Historic Preservation Officer (SHPO) to comply with Section 106 of the National Historic Preservation Act of 1966 (54 U.S.C. §306108), as amended, and its implementing regulations at 36 CFR Part 800. Along with the letter, NASA submitted a memorandum containing Section 106 analysis prepared by AECOM and dated August 1, 2023.

The proposed undertaking, as previously described, involves remodeling interior first-floor office spaces in Building 19 for programs of the United States Geological Survey (USGS). In addition, NASA proposed exterior work, including installing new ramps and accessibility features at two entrances to Building 19 for compliance with the Americans with Disabilities Act (ADA), a storage-transfer lift, security card readers [REDACTED], the addition of USGS program antennae, and other mechanical and equipment, including modification of two sash windows in the rear elevations for mechanical ventilation.

With the August 2023 letter, NASA revised the scope of work to include infill of an additional exterior window and reinstallation of the glass in the transom above the exterior entry door of Conference Room 1218.

NASA's previously identified the Area of Potential Effects (APE) for the undertaking includes the limits of staging and construction for the undertaking and encompasses Shenandoah Plaza and the five major contributors surrounding the plaza: Building 17 (Administration Building), Building 19 (Bachelor Enlisted Quarters), Building 20

(Bachelor Officers Quarters), Building 23 (Instruction Building/ Dispensary), and Building 25 (Administration and Auditorium Building/Theater). Ground disturbance for the undertaking will include limited grading for the ADA-compliant ramp at the façade and footings and electrical lines for the storage transfer lift. The vertical APE includes the extent of ground disturbance to a depth no more than 3 feet deep.

In the previous consultation, NASA determined that the changes proposed to Building 19 would have No Adverse Effect to the building or to the NAS Sunnyvale Historic District. NASA determined that the revised scope would also have No Adverse Effect. After reviewing the information submitted, the SHPO offers the following comments.

- This revised project qualifies as an undertaking with the potential to affect historic properties.
- The APE is sufficient to take direct and indirect effects of the undertaking into account.
- Identification and evaluation efforts are sufficient for this consultation.
- The SHPO has no objection to the proposed Finding of No Adverse Effect.
- Please be advised that under certain circumstances, such as unanticipated discovery or a change in project description, NASA may have additional future responsibilities for this undertaking under 36 CFR Part 800.

If there are any questions or concerns, please contact State Historian Mark Beason, at (916) 445-7047 or mark.beason@parks.ca.gov.

Sincerely,

Julianne Polanco
State Historic Preservation Officer
