Rosemary Cambra, Chairperson
Muwekma Ohlone Indian Tribe of the San Francisco Bay Area
PO Box 360791
Milpitas, CA 95036

Dear Ms. Cambra:

Pursuant to Section 106 of the National Historic Preservation Act (NHPA) of 1966 (as amended), the NASA Ames Research Center Historic Preservation Office (NASA) is inviting potentially interested parties to consult on the proposed archaeological Data Recovery Plan for site CA-SCL-19, prepared in support of the Airfield Navigational Aids, Airfield Lighting, and Signage Replacement (NAVAIDS) Project (Undertaking) at Moffett Federal Airfield, Santa Clara County, California. The Undertaking includes replacement of runway lighting, navigational instrumentation, utility pathways and connections, airfield traffic signage, computerized monitoring system equipment, electrical power distribution equipment, and paved access roads. A map of the Undertaking area is attached for your reference.

A Cultural Resources Assessment Report, documenting the results of records research, a pedestrian survey, and subsurface testing, was prepared for the Undertaking on behalf of NASA. This report was provided to the California State Historic Preservation Officer (SHPO) for review on February 12, 2018. On April 6, 2018, SHPO concurred with NASA’s finding that the Undertaking will have an adverse effect on National Register of Historic Places (NRHP) eligible site CA-SCL-19 through physical alteration of archaeological deposits for installation of subsurface utility conduits. Archaeological site CA-SCL-19, first formally recorded in 1912, consists of a shallow prehistoric deposit containing marine shell fragments and organic-rich midden soils remnant from a larger mound that appears to have been truncated by nearly nine decades of airfield development and use. No temporally diagnostic artifacts or materials have been recovered from the site to date. A Data Recovery Plan is being developed to reduce adverse effects on the historic property to a less than significant level, and a Memorandum of Agreement (MOA) will be established between NASA and the SHPO to ensure implementation of the steps outlined therein.
Although no Traditional Cultural Properties or Sacred Sites have been identified within the Undertaking area, and no Federally Recognized Tribes are associated with this location, the Native American Heritage Commission (NAHC) indicated that your organization may have an interest in the NASA Ames Research Center area.

If you wish to participate as a Consulting Party, please notify us in writing within 30 days of receipt of this letter. Consulting parties will be consulted regarding the proposed Data Recovery Plan to ensure the appropriate treatment of any culturally significant items that may be impacted by the Undertaking. Please contact me at Jonathan.D.Ikan@nasa.gov or 650-604-6859 if you have any questions or need additional information.

Sincerely,

Jonathan D. Ikan
