\*P3a. Description: (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries.)

Building 511 is a high one-story pre-fabricated gable-roofed metal building set on a gravel berm within a chain-link fence enclosure. Large metal sliding doors and a metal and glass personnel door provide access on the east and west sides. Aluminum-framed sliding windows are located on the north and south sides. A small display of three "NAR Weapons" is located in the yard on the south side.

\*B8. Related Features:

B9a. Architect: Unknown

b. Builder: Unknown

\*B10. Significance: Theme Cold War

Area United States

Period of Significance 1946-1989

Property Type Military

Applicable Criteria G

(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building was used to assemble the standard components of nose cone, body, and fins into the weapons such as bombs or Bullpup and Harpoon missiles used in the P-3 mission. This building was directly associated with the Cold War P-3 Orion anti-submarine warfare patrol mission dating from 1963 to 1994 at Moffett Field. Although this mission is considered of exceptional national significance within the Cold War context, this building is of standard pre-fabricated Butler-type construction and does not exhibit unique architectural or engineering features special to the P-3 mission. It is therefore not considered of exceptional significance under criterion G.
