Period of Significance 1946-1989 Property Type Military Applicable Criteria G
(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity.)

This building was used for torpedo maintenance and day-storage. Torpedoes were taken from the AUW complex and placed in this facility if they were going to be overhauled or used on a training flight. This building was directly associated with the Cold War P-3 Orion anti-submarine warfare patrol mission at Moffett Field dating from 1963 to 1994. Although this mission is considered of exceptional national significance within the Cold War context, this building is of standard construction and does not exhibit unique architectural or engineering features special to the P-3 mission. It is therefore not considered of exceptional importance under criterion G.
